GENERAL INFORMATION:
APPLICANT: Alexandrov, Nickolai et al.
TITLE OF INVENTION: Sequence-Determined DNA Fragments and Corresponding Polypeptides
TITLE OF INVENTION: Absorbage
TITLE OF INVENTION: Therby
FILE REFERENCE: 2750-1592PUS2
CURRENT APPLICATION NUMBER: US/11/096,568A
CURRENT FILING DATE: 2005-04-01
NUMBER OF SEQ ID NOS: 34471
LENGTH: 1276
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  54 SGFEGKK--DAGYVINLSKDTFIKPVFKKIEEKKEEENKPTFDVSKKKDNPQVNHSQLNE 111

Sequence 32043, Application US/11096568A

Publication No. US2066048240A1

GENERAL INFORMATION:

APPLICANT: Alexandrov, Nickolai et al.

TITLE OF INVENTION: Sequence-Determined DNA Fragments and Corresponding Polypeptides;

TITLE OF INVENTION: Therby

FILE REFERENCE: 2750-1592FUS2

CURRENT APPLICATION UNDERS: US/11/096,568A

CURRENT FILING DATE: 2005-04-01

NUMBER OF SEQ ID NOS: 34471

SEQ ID NO 32043
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 APPLICANT: Alexandrov, Nickolai et al.

Sequence 7, Application US/10691672A;
Publication No. US20050112133A1
GENERAL INFORMATION:
GENERAL INFORMATION:
TITLE OF INVENTION: GLURP-MSP3 FUSION PROTEIN, IMMUNOGENIC COMPOSITIONS AND
TITLE OF INVENTION: MALARIAL VACCINES CONTAINING IT
FILE REPERENCE: 02356.008
CURRENT PILING DATE: 2003-10-24
CURRENT FILING DATE: 2003-10-24
NUMBER OF SEQ ID NOS: 13
SEQ ID NO 7
APPLICANT: Trawick, John
APPLICANT: Trawick, John
APPLICANT: Carr, Grant
APPLICANT: Carr, Grant
APPLICANT: Trawick, John
APPLICANT: Ramamoro, Robert
APPLICANT: Ramamoro, Robert
APPLICANT: X, H.
TITLE OF INVENTION: Identification of Essential Genes in Microorganisms
FILE REFERENCE: ELITRA.034A

Patent No. 6380370
GENERAL INFORMATION:
PATENT LYAID DOUGETEE-Stamm et al
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO STAPHYLOCOCCUS
TITLE OF INVENTION: EPIDERMIDIS FOR DIAGNOSTICS AND THERAPEUTICS
TITLE OF INVENTION: NUMBER: US/09/134, 001C
CURRENT APPLICATION NUMBER: US/09/134, 001C
CURRENT PILING DATE: 1998-08-13
PRIOR PLICATION NUMBER: US 60/064,964
PRIOR FILING DATE: 1997-11-08
PRIOR FILING DATE: 1997-11-08
PRIOR FILING DATE: 1997-11-08
PRIOR FILING DATE: 1997-11-08
PRIOR FILING DATE: 1997-11-08
